The family run Müller winery is located in the southern part of the Kremstal wine region in the picturesque village of Krustetten. The estate was first mentioned in the archive of the nearby Göttweig Abbey as early as 1270 a.d. as a Lesehof which translated means “wine press house”.

Müller Family Estate est. 1936

In 1936, grandfather Leopold Müller acquired a small vineyard in Krustetten and made the first Müller wine. Nowadays, the 3rd and 4th generation of Müllers is managing the estate, which now encompasses a proud 120 hectares of prime vineyards. The grandsons Leopold and Stefan, together with the entire Müller family, relentlessly work to ensure the best possible quality wines.

*„The secret of our quality
is rooted in the vineyards...“*

PHILOSOPHY

*O*ur philosophy is to work in harmony with nature, in a sustainable and respectful manner. The diverse soil and micro-climatic conditions on the hills surrounding the Göttweig Abbey, in the southern Kremstal wine region, require us to care for every vineyard individually and to fully understand each site in relation to soil, exposure and grape variety. Our knowledge that has accumulated over several generations allows us to produce superior grape quality with distinct and exciting character.

„It is our aim to gently bottle as much of the naturally grown goodness of our wines, as possible“

Stefan & Leopold

At the Müller Estate we are fully committed to sustainability in all our processes. Our new press house and wine cellar is built into the hillside, which helps to keep the internal temperature constant and allows us to use gravity instead of electrical pumps to move the grapes, must or wine wherever possible. We also use our own spring water and biomass heating. This perfect setup allows us to focus on the diligent vinification process. Our aim is to bottle characterful, balanced wines with clear fruit and an enjoyable drinking experience. Our relentlessness has been rewarded with numerous national and international awards and encouraging feedback of our customers.

SUSTAINABILITY

It is our responsibility to preserve our landscape for future generations and try to manage our winery in a way that conserves resources. Through our determination, we were able to meet the strict criteria of the "Sustainable Austria" certification. The program is based on three pillars: Ecology, Economy and Social Aspects.

We have been able to implement many solutions for a sustainable economy:

Continuous growth of beneficial plants and insects and increasing soil recovery through many years of vegetation cover between the vines and careful cultivation of vineyards

Minimal consumption of resources by using the house's own well, installing a photovoltaic system and a wood chip heating unit

Utilisation of natural earth energy by erecting our cellar building on a hillside (60% of the building are underground)

Constant quality yields sustainable success, as well as national and international awards

Voluntary social benefits for employees

Tassilo

vineyard sites dating back to 893 AD

Our exclusive wines from the Wachau wine region come from single vineyard sites first mentioned over a thousand years ago, when the monks of the Kremsmünster Abbey planted vines on this site for the first time, by the order of the Bavarian Duke Tassilo III.

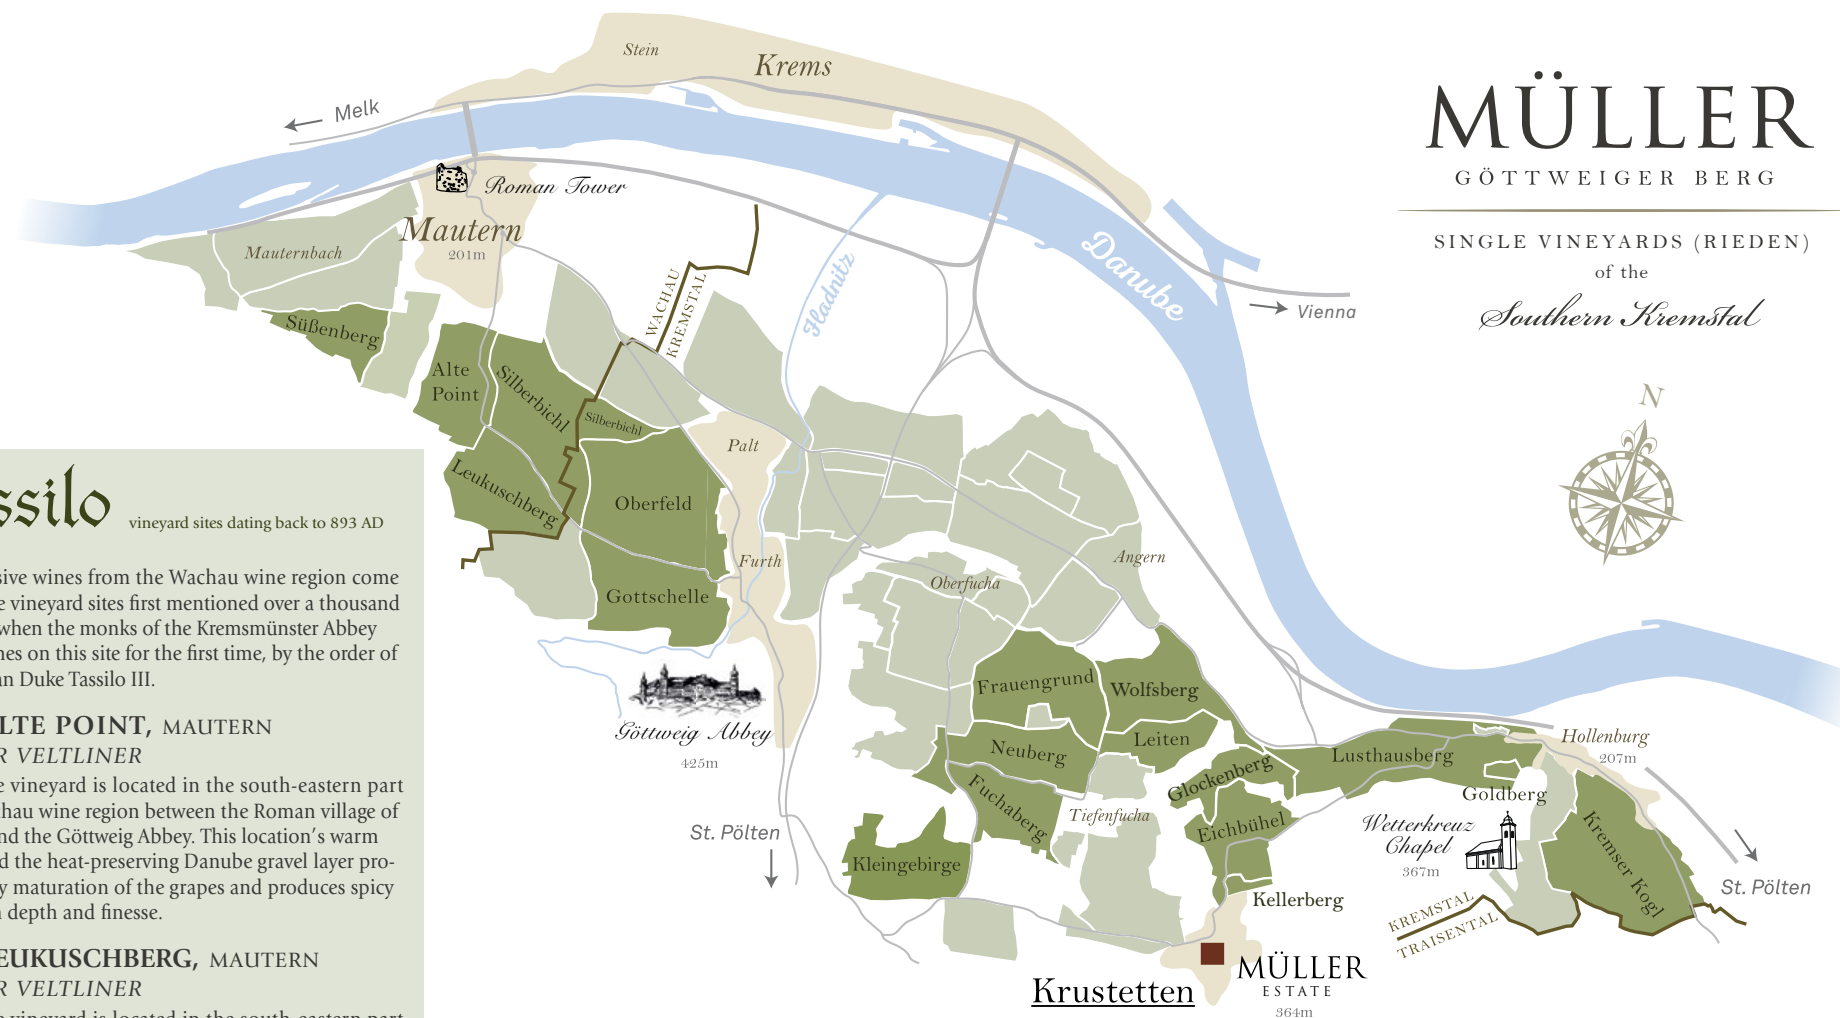

Ried ALTE POINT, MAUTERN GRÜNER VELTLINER

This single vineyard is located in the south-eastern part of the Wachau wine region between the Roman village of Mautern and the Göttweig Abbey. This location's warm climate and the heat-preserving Danube gravel layer promotes early maturation of the grapes and produces spicy wines with depth and finesse.

Ried LEUKUSCHBERG, MAUTERN GRÜNER VELTLINER

This single vineyard is located in the south-eastern part of the Wachau wine region between the Roman village of Mautern and the Göttweig Abbey. The vines of this warm and sun drenched site grow on weathered primary rock, which gives the wines a unique mineral character.

Ried SÜSSENBERG, MAUTERN
GRÜNER VELTLINER, RIESLING & PINOT NOIR
Süssenberg (sweet mountain) is our oldest documented single vineyard. It had already been planted with vines in 893 AD. The many hours of sun and the soil, comprised mainly of weathered rock, provide ideal conditions for fruity, variety-specific wines.

SINGLE VINEYARDS (RIEDEN)

of the

Southern Kremstal

GÖTTWEIGER BERG

GRÜNER VELTLINER, RIESLING,
MUSKATELLER, SAUVIGNON BLANC, ZWEIGELT

With its mixture of deep "Löss" and chalky weathered rock, the vineyard area Göttweig Berg of the southern Kremstal wine region offers ideal conditions for fruity, variety specific wines.

OUR SINGLE VINEYARDS (Rieden)

Ried **KREMSER KOGL GRÜNER VELTLINER & NEUBURGER**

This single vineyard, located close to the small village of Hollenburg, consists of chalky conglomerate soil with various thick layers of "Löss". The Danube facing terraces are situated near the top of the "Kogl" which has cooler night temperatures and produces finely structured, elegant & aromatic wines.

Ried **KREMSER FRAUENGRUND GRÜNER VELTLINER**

This site consists of a thick layer of pure "Löss". It is rich in nutrients and retains water like a sponge in the hot and dry summers. Wines from this site represent the classic type of Grüner Veltliner with spicy fruit and fresh floral aromas.

Ried **NEUBERG GRÜNER VELTLINER**

This single vineyard consists of south-facing terraces and is characterised by a layer of "Löss" over weathered chalky rock. Ried Neuberg is a perfect single vineyard for Grüner Veltliner, it offers great conditions for ripe fruit and elegance in the wines.

Ried **FURTHER GOTTSCHELLE GRÜNER VELTLINER**

First mentioned as "Gotschali" in 1341, it is situated at the foot of the Göttweiger mountain. The south-facing old Danube terrace has a mighty "Löss" layer with high proportions of gneiss and granite in the subsoil.

Ried **EICHBÜHEL GRÜNER VELTLINER RESERVE**

Our highest single vineyard (335m) near Krustetten is characterised by a chalky conglomerate rock. This exposed location and the slightly cooler climate allow a long maturation on the vine which results in complex, layered wines with outstanding elegance.

Ried **FURTHER SILBERBICHL RIESLING**

The first mention of this site, as a single vineyard, dates back to 1562. The name stems from the presence of mica (silver) in the deeper soil layers and the location on a hill (Bichl). Due to its south-eastern exposition it is the perfect site for Riesling.

Ried **LEITEN RIESLING**

With its southern exposure, a gradient of steep 25% and weathered primary rock, it forms a magnificent Riesling vineyard site. Due to the closeness to the Danube river, there are high temperature fluctuations between day and night which give the wines elegant fruity aromas.

Ried **HOLLENBURGER GOLDBERG RIESLING RESERVE**

The small single vineyard Goldberg has a southern exposure and is dominated by chalky conglomerate rock. The particularly warm micro-climate promotes the ripening process of the grapes and lays the foundation for wines with intense fruit and complexity.

Ried **KREMSER LUSTHAUSBERG WEISSER BURGUNDER**

The east-facing sloping terraces made up of chalky conglomerate gravel, directly face the Danube river. This location is ideally suited for Pinot Blanc.

Ried **FUCHABERG CHARDONNAY RESERVE**

The gentle hill of the Fuchaberg offers ideal conditions for fruitful and full-bodied wines—barren weathered rocks store the heat in this sun-drenched site and the exposed location allows the wind to dry the vines quickly after a rain shower.
